

## Engines Used in Agricultural Operations Fact Sheet

Do you own or operate a **stationary** engine over 50hp?

Do you own or operate a **portable** (tow-behind) engine over 50hp that operates in the same location every season?

**You need to register the engine with the District.**

### Rule Overview

-Engines more than 1/2 mile from the nearest off-property residence or business are **exempt** from the emissions standards below but must still register.

-Tier 0 engines (generally pre-1996), unless they have already registered as a low-use engine, may not be legally used in Butte County.

-Tier 1 and Tier 2 engines 50hp to 175hp must meet emissions standards by the end of 2015 or 12 years after installation.

-Tier 1 and Tier 2 engines over 175hp must meet emissions standards by the end of 2014 or 12 years after installation.

-New engines purchased and sold must meet the most current Tier certification and must be registered within 90 days of installation.

Do you own a **portable** engine over 50hp that frequently changes location?

Portable engines must either comply with the State's Portable Engine Air Toxic Control Measure (<http://www.arb.ca.gov/portable/portable.htm>) or, as an option, register with the District voluntarily and meet the emission standards for a stationary engine.

### Carl Moyer Program

Funds may be available to help replace older engines. Only registered engines Tier 1 and newer are eligible to apply.
