

BUTTE COUNTY AIR QUALITY MANAGEMENT DISTRICT ASBESTOS EXEMPTION FORM

This form is provided for the permit applicant to make a written declaration that friable or Regulated Asbestos Containing Material (RACM) is not present at the commercial site where renovation or demolition activities are planned to occur. If friable asbestos or RACM is present, sampling will need to be performed to determine the amount of asbestos present in the material that is planned to be disturbed.

Sampling is not required for a renovation or demolition project if the structure is a single-family dwelling (e.g., a single-family private residence or mobile home used as a single-family dwelling), or a residential structure having four or fewer dwelling units (e.g. an apartment building with 4 units or less). Projects that disturb less friable or Regulated Asbestos Containing Material (RACM) materials than listed below are not subject to Rule 270 and the project is exempt from District Asbestos Demolition and Renovation requirements:

- 260 linear feet (80 linear meters) on pipes; or,
- 160 square feet (15 square meters) on other facility components; or,
- 35 cubic feet (one cubic meter) on other facility components.

A survey is required for commercial projects when it has been determined by a thorough inspection of the material to be disturbed contains friable asbestos or Regulated Asbestos Containing Material (RACM) more than 1% and meets or exceeds the minimum of:

- 260 linear feet (80 linear meters) on pipes; or,
- 160 square feet (15 square meters) on other facility components; or,
- 35 cubic feet (one cubic meter) on other facility components.

Questions? Asbestos renovation and demolition questions should be directed to the Butte County Air Quality Management District at 530-332-9400 or email asbestos@bcaqmd.org.

I have read and understand the above information and declare under penalty of perjury that a written asbestos notification of the U.S. Environmental Protection Agency, or its designee, Butte County Air Quality Management District, is not required for the demolition and/or renovation project for which a permit is sought.
