1. Fee Exempt Acreage includes:
 Young orchards (1st through 3rd leaf) are exempt from fees due to limited burning, but must be listed.
 Acreage where some or all of the the prunings are chipped as an alternative to burning.

Example #1: A grower has 50 acres of almonds and 25 acres are 1st through 3rd leaf. 50% would be fee exempt (% Fee Exempt) and the "Fee Acres" would be listed as 25.

Example #2: A grower farms 100 acres of walnuts and all of the prunings are chipped, but on average, about 10% of the trees are lost each year due to storm damage. Because the grower intends to burn waste from about 10% of the orchard, the "% Fee Exempt" would be listed as 90% and the "Fee Acres" would be 10.
