

Public Notification
Pursuant to California Health and Safety Code §42301.6
Supplemental Information

Applicant: _____ **Project:** _____

California Health and Safety Code (HSC) Section 42301.6 requires the Air Pollution Control Officer (APCO) to prepare and issue a public notice prior to approving an application for a permit to construct or modify a source which emits hazardous air emissions when located within 1,000 feet of the outer boundary of a school site. Such notice is to be distributed or mailed, at the permit applicant's expense, to the parents/guardians of children enrolled in any school located within one-quarter mile of the source and to each address within a radius of 1,000 feet of the source. The notice shall be made by the APCO at least 30 days prior to the date of the final action on the permit application.

Comments received are considered prior to taking final action on the application. The District provides a written response to each comment. While a public hearing concerning the proposed permit action is not required, the Butte County Air Quality Management District (District) may hold an informational meeting to explain the District's proposed permit action and answer questions.

Requirements:

1. Provide the District with a map to scale showing the emission source, schools within one-quarter mile, and the area within 1,000 feet of the source.
2. List the school(s) requiring notification (include address) (attach additional sheets if necessary):

_____	_____
(Name)	(Name)
_____	_____
(Address)	(Address)
_____	_____

The District will contact each school to obtain the required parents/guardian mailing addresses.

3. Provide an electronic list of all the addresses within 1,000 feet of the source or request the District to obtain such a list from other agencies and/or services.
4. Provide a deposit of \$500 to cover the expense of processing the public notification. The fee will vary depending on the number of notices mailed. The District will either apply any remaining funds to the Authority to Construct fee or include additional costs with the Authority to Construct invoice.

The District will prepare the required public notice and distribute or mail the notices. The public comment period required by statute is 30 days, and a permit subject to these requirements cannot be issued until after that period has been completed

Questions regarding these procedures may be directed to District staff at (530) 332-9400.
